

July 9, 1998

This is an informal comment
regarding rm 9209 and rm 9242.
I support the the legalization
of microradio (low power fm).

There is a problem of media
concentration of ownership of
all commercial radio /TV and newsprint.
Low power fm; except non commercial
could allow local community groups
a mechanism to communicate topics
of interest. It would allow people in
rural areas additional entertainment
not provided by their local commercial
networks. It would allow students
an opportunity to learn about radio.

Yours, Russ Todd
